

Professional Certificate Course

Course Name Aircraft Accident Investigation Techniques and Management

Delivery Onsite / Classroom 10 days (8 hours per day)

About the Course

The Advanced Accident (Incident) Investigation course provides participants with the knowledge, skills, and resources necessary to thoroughly investigate work-related accidents and injuries. In addition to the proper conduct of accident investigations, participants will be guided through exercises designed to help calculate the cost of an accident, preparation, and analysis of accident reports, eyewitness interviewing techniques, systems for cause analysis, proper closeout of investigations, and related legal issues.

Learning Objectives

Upon completion of this course, participants will be able to:

- Develop the knowledge and skills required to investigate all adverse events;
- Understand the causes of accidents and ill-health;
- Understand the elements that combine to form an accident;
- Develop confidence & professionalism in investigating, interviewing & reporting;
- Ensure all employees & contractors are aware of the SMS and 'Safety Culture';
- Apply the legal requirements and company procedure.

Target Audience

- Civil aviation authorities;
- Airport authorities;
- Air navigation service providers;
- Airlines;
- Accident investigation agencies and related aviation organizations;
- Chief Accident Investigator.
