Professional Certificate Course

Course Name   **Introduction to Airport Capacity and Development**

Delivery   *Virtual Class / Online*   5   days (3 hours per day)
Onsite / Classroom   3   days (8 hours per day)

About the Course

The course will provide the participants with an understanding of the principles and methods applicable to airport capacity calculation, including industry best practices applicable and how to manage temporary capacity reduction scenarios. Airport development and capital investments will be addressed from a strategic perspective for efficient management decisions.

Learning Objectives

Upon completion of this course, participants will be able to:
- Apply guidance material on establishing airport capacity parameters.
- Use best practices to conduct the airport capacity analysis.
- Optimize operations to meet demand for capacity in the short to medium term before an expansion of the infrastructure may become available.
- Evaluate airport development requirements and make effective decisions for major capital investments.

Target Audience

This course is addressed to airport staff with scheduling and management reporting responsibilities, as well as to the airport management.
